
EDUCATION

Bachelor of Technology Dayanada Sagar University, Bengaluru Majors: Computer Science - Artificial Intelligence and Machine Learning Current CGPA-8.21	2022-Present
Pre-University Certificate (PUC) Christ Junior College, Bengaluru Majors: Physics, Chemistry, Mathematics, Biology (PCMB)	2019-2021

SKILLS

- **AI/ML:** Machine Learning, Deep Learning, Generative AI, Natural Language Processing (NLP), Prompt Engineering, LLM, RAG.
- **Languages :** Programming : Python, Java, C(Basics) Personal Communication: English, Tamil, Kannada, Hindi, Telugu
- **Frameworks :** TensorFlow, Scikit-learn, Keras, OpenAI GPT, Data visualization (matplotlib, seaborn), JavaServer Pages, FastAPI, Streamlit
- **Development Tools :** VSCode, Unity, Eclipse, WhatIf tool .
- **Other:** Presentation, Teamwork, Leadership, Adaptability

PROJECTS

MEDI-BOT- a baymax inspired chatbot for healthcare | [Link](#)

- **Technologies :** Python, LLM (Flan-t5), RAG (FIASS), FastAPI ,Streamlit,
- **Description :** Developed a Baymax inspired chatbot that uses flan-t5 to generate responses with user's query and top-k embedding retrieved from knowledge base using FIASS indexing. has backend with fastapi and frontend by streamlit

ZENO.V - A Personal AI Assistant with Face Recognition| [Link](#)

- **Technologies :** Python, Voice Recognition, Natural Language Processing, Face Recognition, Task Automation.
- **Description :** Developed an AI assistant that automates tasks like opening apps, setting reminders, and providing weather updates using voice commands. Integrated face recognition to enable personalized user experiences.

JAVA CHATAPP - Multiuser terminal chatapp| [Link](#)

- **Technologies :** Java, Client-Server Model, Multithreading, IntelliJ, Object-Oriented Programming (OOP), Serialization.
- **Description :** Developed a terminal-based multiuser chat application using Java's client-server architecture and multithreading .Ensured data persistence and efficient communication using object serialization.

ISCRIPPT - A Movie Script Generator using Gen-AI Model| [Link](#)

- **Technologies :** Python, GenAI, Flask, Natural Language Processing, OpenAI-GPT3,
- **Description :** Designed a GenAI application that takes user input and generates movie scripts tailored to given specific scenes. Utilized NLP models to ensure coherent scene generation and appropriate dialogue structure.

IMAGE STYLIZE - An Artistic Image Style Transfer Application | [Link](#)

- **Technologies:** Python, TensorFlow, OpenCV, Neural Style Transfer, NumPy, Matplotlib
- **Description :** Developed an image stylization project using Neural Style Transfer that blends artistic elements from one image with the content of another, generating visually striking outputs.

CERTIFICATIONS

- **Introduction to Augmented Reality and ARCore | [Certificate](#)**
 - Learned AR concepts and explored ARCore features, and differentiated between AR, VR, and mixed reality (MR) and their applications.
- **Introduction to Generative AI | [Badge](#)**
 - Learned generative AI techniques and their applications in text, images, and music also got introduced to popular LLM models
- **Java Server Pages | [Certificate](#)**
 - Acquired expertise in JSP for creating dynamic web content, with hands-on experience in embedding Java code within HTML to develop responsive and scalable server-side applications

Eager to bring fresh perspectives and innovative solutions, I am excited about the opportunity to collaborate, learn, and help shape the future of your team.
